DE-ICER

Description:

Airolube De-icer is a ready-to-use natural formula for defrosting windows. No longer with the window scraper in the weather, De-icer sprays over the frozen surface and the ice immediately melts away.

Airolube De-Icer is produced under our strict ecological conditions and within an entirely CO₂-neutral production environment. De-icer is developed on the basis of natural ingredients.

Application:

Defrost windows.

Instructions:

Open the atomizer. Spray the window with Airolube De-Icer. DO NOT spray against the wind direction. If the window has not yet been completely defrosted, spray it again.
