

TYRE SEALER

Physical properties:

Color	White
Appearance	Liquid
Shelf life in tire	2 to 7 month
Available volumes	80ml / 500ml

Omschrijving:

Airolube Tyre Sealer is a plant-based fluid for making bicycle and car tires tubeless.

The natural formula of the Airolube Tyre Sealer closes all holes up to 6mm with ease. This way, the chance that you will come to a standstill due to a flat tire is a lot smaller. Airolube Tyre Sealer works optimally for several months.

The exact shelf life in the tire depends on weather conditions and use. Therefore, check every 3 to 4 weeks whether the Tyre Sealer is still liquid. If necessary, top up. Like all other Airolube products, the Tyre Sealer is also biodegradable. The packaging is also fully recyclable.

Toepassing:

Sealing air leaks in tires.

Gebruiksaanwijzing:

Pour 80ml Airolube Tyre Sealer into mountain bike tire, racing bikes can have 40ml per tire. This can be done through the valve opening or by partially removing the tire from the rim. Fit the tire or valve and bring the tire to the correct pressure. Turn the wheel several times to allow the fluid to cover the entire tread. Check the condition of the Tyre Sealer every 4 weeks, top up if necessary.
