

## THE ULTIMATE CHAIN WAX

### Physical properties:

<b>Color</b>	Grey
<b>Appearance</b>	Liquid
<b>Temperatuurbereik</b>	-5°C / 40°C
<b>Available Volume</b>	100ml

### Description:

This wax has unprecedented adhesive strength and gives your chain everything it needs through all kinds of weather. ULTIMATE Chain Wax penetrates deep between links and resists unprecedented pressure.

With the ultimate formula of plant-based ingredients and 19.3% resistance-reducing additives, this wax lowers resistance and lets you get the most out of every move. We put the wax to the test extensively and saw distances of up to 400km with just one lubrication!

### Application:

Suitable as lubricant for bicycle chains. Airogroup Chainwax is suitable as a lubricant for chains.

### Instructions:

Degrease the chain before using the ULTIMATE Chain Wax. For best results, use the Ultimate Chain Cleaner. Then apply the Chainwax to a dry chain, a drop on each link is sufficient. Let the wax soak in for 5 hours, then remove the excess Chainwax with a dry cloth.

After a long or wet bike ride, remove the chain with a dry cloth. Applying a new layer of chain wax to each link, the bicycle chain is ready for its next ride.
