

## MOTOR RACING CHAIN LUBE

### Description:

Airolube Motor Racing Chain Lube is the natural lubricant that has been specially developed for lubricating the motorcycle chain.

This plant-based formula has an unprecedented adhesive strength, which ensures good adhesion, ensures safe lubrication and protects against corrosion. In addition, this chain lubricant lubricates all links of the chain and ensures lower friction between the links and parts. This creates less resistance and gets the most out of the parts. We recommend applying a fresh coat of lubricant to the chain every 500 kilometers. If you often drive in the rain, it is wise to lubricate the chain more often.

The motorcycle chain is best lubricated just after the motorcycle has been ridden. After driving, the chain is still warm, causing the chain to expand. This gives the chain oil the chance to adhere better between the links.

### Application:

Lubricate the motorcycle chain. Can be used for all weather conditions.

### Instructions:

Place your bike on the center stand or on a paddock stand. If necessary, degrease the chain with Airolube Super Degreaser before using the Motor Racing Chain Lube.

Apply the chain lubricant to the inside of the chain and turn the rear wheel slowly. Continue until the chain is completely lubricated. Leave the Motor Racing Chain Lube on for half an hour and the bike is ready for the next ride.

### Physical properties:

<b>Color</b>	Dark yellow
<b>Appearance</b>	Liquid
<b>Temperature range</b>	-15 °C / 50 °C
<b>Available volumes</b>	100ml / 500ml

The content of this document is intended to enable the reader to orientate himself on the properties and possible applications of products produced under the labels of Airogroup BV. The analysis data mentioned in this product data sheet are typical values. Small deviations, which can occur during the normal manufacturing process of the product, will not affect the quality of the product. Although this text has been compiled with great care, the compiler accepts no liability for damage resulting from incompleteness and/or inaccuracies in the text. The reader is advised the final product choice in consultation with the supplier.
