

SPEED WAX

Physical properties:

Color	White
Appearance	Liquid
Available volumes	500ml / 1000ml / 5l

Description:

Airolube Speedwax is a wax emulsion for the protection and finishing of paints for bicycle, car and agricultural vehicles.

The natural formula of the Airolube Speedwax leaves a water-repellent and dirt-resistant wax layer on the paintwork. This protects the paint optimally from external influences. Airolube Speedwax gives the paint back its showroom look, without the addition of silicone.

Airolube Speedwax is a plant-based formula that is biodegradable in its entirety. The unique composition is safe to use and free of any kind of hazard labels. All Airolube packaging is also fully recyclable.

Application:

Protecting and finishing paints.

Instructions:

Before use, first clean the paint layer, using a cleaner such as the Airolube Universal Cleaner. Then spray into the entire surface with Airolube Speedwax. Wipe out the Speedwax with a gentle cloth with a brushing motion.
