

Physical properties:

Color	Transparant
Appearance	Liquid
Non-ionic surfactants	5-15%
Amphoteric surfactants	<5%
Available volumes	500ml

INSECT REMOVER

Description:

Airolube Insect Remover is a plant-based formula for removing insect residues from paint or glass.

The natural formula absorbs the insect residues and soaks them away from the surface. The Insect Remover is friendly to treated and untreated paint layers.

Insect Remover, like other Airolube products, is biodegradable. The packaging is also fully recyclable.

Application:

Removal of insect residues from paint layers.

Instructions:

Spray the insect residues with Airolube Insect Remover. Let it soak for a few minutes. Then polish off the remains with a damp cloth or sponge. In case of dried insect residues, allow the formula to absorb longer and repeat the treatment where necessary.

The content of this document is intended to enable the reader to orientate himself on the properties and possible applications of products produced under the labels of Airogroup BV. The analysis data mentioned in this product data sheet are typical values. Small deviations, which can occur during the normal manufacturing process of the product, will not affect the quality of the product. Although this text has been compiled with great care, the compiler accepts no liability for damage resulting from incompleteness and/or inaccuracies in the text. The reader is advised the final product choice in consultation with the supplier.
