## SCREENWASH WINTER -15°C

### Description:

Airlube Winter Screenwash is a ready-to-use formula for the windscreen fluid reservoir. The Winter Screenwash ensures a good view of the road by effectively cleaning dirt and brine residues on the car window. The natural formula of Winter Screenwash prevents the liquid from freezing again due to driving wind. The Winter Screenwash has an optimal operation up to -15 °C.

Airlube Winter Screenwash is produced under our strict ecological conditions and within an entirely CO<sub>2</sub>-neutral production environment. Winter Screenwash is developed on the basis of natural ingredients.

### Application:

Cleaning car windows.

### Instructions:

Open the bonnet of your car and look for the window wiper fluid reservoir. Fill the reservoir to the maximum indicated with Airlube Winter Screenwash, then close the reservoir and bonnet. Immediately after filling to use.
