EXTREME FOAM CLEANER

Description:

Airlube Extreme Foam Cleaner is a plant-based pre-wash formula for cleaning the paintwork of cars, motorcycles, trucks, etc.

The natural formula is easy to dose in the foam reservoir of any foam gun. The product ensures that the surface is covered with Extreme Foam. This foam layer soaks stubborn and dried-in dirt from the paint and ensures that it can be removed easily and scratch-free afterwards.

Like other Airlube products, Extreme Foam Cleaner is biodegradable. The packaging is also completely recyclable.

Application:

Cleaning of paintwork of cars, motorcycles, bicycles, etc.

Instructions:

Fill the reservoir of the Foam gun with Extreme Foam Cleaner. Set the mixing ratio to 100ml per liter of water. Then make sure that the entire surface is covered with a layer of foam. Then let the foam do its work for a maximum of 5 minutes. Rinse off the dirt with water. Stubborn dirt has loosened. Now treat the surface with Airlube Super Wash for the best end result.
